

Green IT Citizen

Introduction

Green IT Citizen provides every IT user the means to participate to a greener way of working.

In the end a significant number of Green IT users will lead to a contribution towards a better environment and to cost reductions for companies and even for individuals.

A Green IT Citizen will become aware of such issues as:

- ✂ How to reduce energy use
- ✂ How to work more efficiently
- ✂ How to reduce travel costs
- ✂ How to purchase IT components
- ✂ How to handle IT waste

The emphasis is on how to apply Green concepts at work and at home.

Green IT Citizens fit perfectly into existing or newly developed sustainability policies of companies, organizations and governments.

Course Outline		
Understanding the World of Green IT	Green measures for IT components	Organizational measures on Green IT
✂ Background of Green IT	✂ Green Screens and Computing Machines	✂ Greening the facility
✂ Drivers for Green IT	✂ Desktop Energy waste reduction	✂ e-Waste prevention
✂ Green IT Winnings	✂ Less-Paper use	✂ Collaboration technologies

Target Audience

Everyone in the organization who is using IT
